Company presentation

Dear Ladies and Gentlemen,

the Company **Thomas Wacker** would like to present its services in the field of **plastic injection moulding and assembly**.

We specialize in plastic injection moulding and assembly work and are in a position to process virtually any thermoplastic material. Our product portfolio in the injection moulding field currently ranges from very small industrial parts to mouldings with weights of up to 1300 g (polystyrene).

We also have the equipment required for the assembly and processing of parts and subassemblies.

We currently use injection moulding machines with the following technical data:

Clamping force	150 to 6500 kN (15 – 650 t.)
Shot capacity	up to 2260 g (polystyrene)
Platen spacing	from 150 mm to 1000 mm

Machines: Latest-generation Demag 80 – 650 t and Arburg 15 – 80 t injection moulding machines

Our machines are also equipped with additional peripherals to ensure trouble-free production processes.

"Working together for environmental protection and quality"

**Certified to
DIN ISO 9001- 2000 and DIN ISO 14001 environmental audit.**

We are convinced that we could make a competitive quotation and look forward to your enquiry.

Yours sincerely

Thomas Wacker
